

Care instructions for wool

Daily care and immediate stain removal will ensure that your wool upholstery will keep looking good for many years to come.

It is normally sufficient to regularly vacuum and air furniture upholstered in wool fabric.

However, it is a good idea to clean the wool fabric occasionally.

Use an approved wool shampoo and follow the instructions carefully. Take care never to saturate the wool fabric. Never use undiluted cleaning agents, bleaching agents, ammonia or soap intended for hard surfaces.

Stain removal

If you act quickly, it is not difficult to remove a spill and thus avoid staining.

First, soak up the liquid with an absorbent napkin or cloth and roughen the surface of dried stains using a spoon. The treatment is undertaken from the edge of the stain towards the middle to avoid the stain spreading further. Then, treat the stain according to the following guide:

1. Mineral turpentine, vegetable turpentine or similar.
2. Stain remover for fat or oil.
3. Water with furniture shampoo added.
4. Acetone or nail varnish remover - oil-free.
5. Cold water.
6. Surgical spirit.
7. Borax: 1 tsp in a little hot water in a cup, topped up with cold water.
8. Table salt: 1 tsp in a cup of warm water.
9. Use no. 3, adding a dash of spirit vinegar.
10. 1 tsp of detergent in 1 cup of hot water.
11. Surgical spirit diluted with water 1:5.
12. Household disinfectant; 1 tsp to 1 litre of water.
13. Use no. 7, adding a dash of spirit vinegar.
14. Cool with ice cubes in a plastic bag, break the chewing-gum/candle wax and carefully remove the loose pieces.
15. Run a hot iron over layers of absorbent, white paper.
16. Contact a specialist.
17. Vacuum thoroughly.
